

2. Educational Website

1. Course Catalog (Browse & Search)

- A page where users can browse all available courses.
- Including category filters (e.g., Programming, Math)

2. Course Purchase

- Logged-in users can purchase a course.
- Add to cart

3. Course Content Access

- Once enrolled, users can access videos, PDFs, or text lessons.

4. Admin Panel

- For site admins to:
 - Add/edit/delete courses
 - Manage users
 - Upload course materials
- Create a separate login for admins.

5. Progress Tracking (Optional)

- Let users mark lessons as “completed.”
- And store this data in a user progress table.

6. Rating and Reviews for Courses

- Logged-in users can rate and review a course after completing it.
- Display average rating on course list.

7. Simple Payment Integration

- Use buttons like “Buy Now” and store purchase info in the database.

8. Course Completion Certificate (Basic)

- Generate a downloadable PDF that says
“Certificate of Completion awarded to [Name] for completing [Course Title]”.
